## Tip of the Month

### Disable Hibernation

Right click on an empty part of your desktop and select properties. Click on the screen saver tab. Click on the power button

Change your settings to never to turn off monitor, turn off hard disks, and system standby. Click apply, Click on the hibernation tab, Notice how much disk space is required to hibernate. Uncheck the enable hibernation box and you will get back the free space, for mine it was just about 1 gig of space. Click apply, click ok, and click ok, until all the boxes are gone.

### Term: CD Rom drive:

Short for compact disc-read-only memory, a type of optical disk capable of storing large amounts of data. Another optical disk is DVD. Digital versatile disc or digital video disc. A DVD disk holds a lot more data than a CD Rom disk.
