May 2010

## Tip of the Month

### 10 Ways to tune up your PC

Everything needs a tune up: cars, piano's even computers.

Here are 10 ways you can tune up your PC to help keep it running smoothly and efficiently.

- 1) One of the best things you can do to protect your PC is also one of the easiest: Make sure your PC has all the Microsoft updates. Not only Windows, but Microsoft office also. Go to [www.microsoft.com](http://www.microsoft.com) and click on Microsoft Update, then click check now. Just follow the easy instruction, and if you get into trouble, just give me a call.

Look for step 2 next month, If you would like to read the entire document go to my website <http://www.scallycomputechs.com>

### Term: Video display controller

Produces the output for the computer monitor. This is either build into the motherboard or attached in its own separate slot ( PCI, PCI-e, or AGP ) in the form of a graphics card.

### BNI: Business Networking International

The BNI group that I belong to is called BNI Peninsula Connections. We meet every Friday at 8:30 AM in Hobee's Restaurant in Belmont, CA. BNI is the largest business networking organization in the world. We offer members the opportunity to share ideas, contacts and most importantly, business referrals. Give me a call if you would like to attend our next meeting
