Professional Computer Support and Services

OCTOBER 2010 NEWSLETTER

Current News

October 2010

Sad news: One of my clients, Mitch Van Wye unexpectedly passed away a couple of weeks ago at the age of 51. He was a good mentor, and a great leader. This was a big wakeup call for me. I have been working with my financial advisor, and insurance broker to make sure all my finances are in order. I would also like to be a resource for you, my clients. If you are in need of a financial planner, insurance agent, tax advisor, and Will and trust attorney. Please give me a call or send me an email to get in touch with them.

Featured Service

Disaster Prevention: This service helps you be prepared for a disaster before it happens. There are three modules to this service. Data backup to external drive. Data backup offsite in the cloud. Image based backup to external drive. This service can be a complete package or just one module.

Tip of the Month

10 Ways to tune up your PC

Everything needs a tune up: cars, piano's even computers. Here are 10 ways you can tune up your PC to help keep it running smoothly and efficiently.

6) Check for Viruses and Spyware

Has your computer really slowed down since you bought it? Are windows occasionally popping up or programs starting independently? Is your hard drive constantly spinning? These and other problems may be caused by viruses or spyware. Be sure your computer has protection against viruses, spyware and malware. If you don't already have security software installed, try Microsoft Security Essentials

Look for step 7 next month, If you would like to read the entire document go to my website <http://www.scallycomputechs.com>

Term: Router

A router is a networking device whose software and hardware are customized to the tasks of routing and forwarding information. A router has two or more network interfaces, which may be two different physical types of network. Such as, Cables and wireless. 1 interface connects to your DSL or Com-cast Modem for Internet. The other interface connects your computers and laptops together so you can print and share internet access. Some brand names are, Linksys, Netgear, Zyxel, Cisco, and Bel-kin
